MOBILE APPLICATION DEVELOPMENT

Application Development Services
for BlackBerry®

Corporate Profile

CellAvant® provides the development and consulting services needed to bring your BlackBerry® application to life and into production. We can help you design and build an easy–to-use, graphically rich application that meets your business goals and integrates with your backend application or database. As a BlackBerry® Alliance Elite Member, CellAvant has helped many companies, ranging from start-ups to large enterprises, bring their BlackBerry applications to market.

CellAvant is headquartered in Virginia, with offices in the Washington D.C. metro area. CellAvant is the commercial subsidiary of a large government contractor that provides professional services to U.S. federal agencies. We have received outstanding customer ratings and reviews for over 25 years. Our continuing commitment is to provide our clients with market-leading mobile applications and outstanding service.

Services

- **Mobile application design, development, consulting, and integration**
- **Porting existing iPhone applications to the BlackBerry® platform**
- **QA testing**
- **System integration**
- **Application/data hosting**

Mobile Project Examples

Field Service Applications – automate field service processes like data capture; leverage the GPS and camera capabilities of the latest BlackBerry smartphones

CRM Applications – automate client and contact management, opportunity tracking, business development and activity management

Business Intelligence Applications – turn your BlackBerry smartphone into an executive dashboard to monitor the status of critical items in real-time

Content Delivery Applications – provide almost instant access to key information, with or without a wireless connection – allows for subscription to and synchronization

Time & Expense Applications – automate the collection, validation, approval, and processing of labor, expense, and human resources related information

Unique Solution Benefits

- **Rapid Application Development**

  CellAvant maintains an extensive library of common code – mobile application "building blocks" – used to build BlackBerry applications quickly and efficiently. Decrease the time it takes to get your mobile application in the hands of your users.

- **Native BlackBerry Development Best Practices**

  Let our experience work for you. CellAvant is adept at developing applications that create an on-device copy of relevant data for full application functionality even without network coverage. We are security-focused and experienced in developing applications that maintain data integrity both while at rest and in transit.

- **Integration and Back-End System Support**

  CellAvant integrates mobile applications with back-end systems, applications, and databases. CellAvant also develops back-end systems including Oracle and Microsoft databases and IIS and Apache web servers running on Windows and Unix. Our team provides expertise in Java, C#, and VB programming languages, web services, and other legacy client/server models.

- **Graphically Rich Easy-to-Use Application Interface**

  CellAvant's graphics design team gives each BlackBerry smartphone application a unique, professional, and highly-attractive user interface to greatly enhance our clients' branding on the BlackBerry smartphone as well as the application's appeal and usability.

- **Localization**

  CellAvant builds multilingual applications and provides application localization services. Supported languages include English, French, German, Italian, Spanish, Dutch, Hebrew, Chinese, Russian, Vietnamese, Portuguese, and Japanese.
